

# Helicopter Awareness Training

## **Course Description.**

This 1-day program is designed for persons involved in working with helicopters as passengers and crew members, traveling inside the helicopter and working safely externally, within the vicinity of the aircraft.

The course will include:

### **Introduction to Helicopters.**

- An overview of what helicopters can do safely
- Area assessment
- Safe zones
- Flight/mission briefing

### **General information**

- Why weight & balance is so important
- Regulations and Responsibilities
- Flight Following
- Cargo limitations
- Human factors
- Dress code

### **Boarding and exiting for running, stationary aircraft.**

- Area assessment
- Safe zones
- Boarding and exit procedures

### **Boarding/exit procedures for hovering aircraft.**

- Area assessment
- Hover boarding/exit and passenger sequence

### **Working with cargo**

- Loading/unloading goods and equipment.
- External load safety

### **Survival Gear**

- Personal gear
- Aircraft Survival Kit

HAT can be conducted at a location of your choosing; however, we highly recommend the training be conducted at L R HELICOPTERS' facility for optimum training opportunities including hands on experiences with the aircraft.
